Sustainability

Carbon Management

International Standards

- i. **Greenhouse Gas Emissions Quantification (ISO 14064-1)**
Helping identify reduction opportunities, enhance efficiency, and demonstrate climate commitment to stakeholders.
- ii. **Greenhouse Gas Emissions Verification (ISO 14064-3)**
Third-party verification of your GHG inventory ensures accuracy and stakeholder trust.
- iii. **Carbon Footprint Product Assessment (ISO 14067)**
Lifecycle carbon evaluation identifies reduction opportunities for products and operations.

Local Standards

- i. **Carbon Audit**
Qualified service providers (QSP) for HKSAR carbon assessment services.
- ii. **Energy Audit (BEE0)**
Effective tool to save energy in buildings and public areas.
